Iranian Celebration in London	301
In appendix you can see	306
In second book you will read	314
In appendix you can see	315

Forward

In process of writing this book, I was dealing with all kind of treat and abuse and sabotage, But nothing was going to stop me of my decision to show what kind of medical institution Mayo is and how much they did crime .After book in Persian was published they control selling it but again was not important, I did paid the highest payment to printing company with worse possible job.

For translation of book was the same but as usual I should be ready to make trick and so I use several translator control line by line the book and compare it with original word by word till every thing would be told exactly the way that happened .

first translator got down payment , only send 50 page of translated work for me and all time said I am doing job till close to his delivery date ,He told give me more time I will do it. 3 more month passed when I called him why you are not send in any translation for me by Email ,he told me I am upset with movie maker, told me I am not doing translation .(his voice that after translation of book is finished and job is done with some other people is recorded on answering machine that for 20 minute swearing to me .)

I was getting boat for presentation of book in Frankfurt book fair so I tried several groups all become know and after that they refused. so I began my self, this time I was shore will not finish with all my other duty so I went to a official translator office and gave them part of book and pretend that rest is translated, few days later I was faced with search around of me that they (American) were trying to found out how much is left,I found an other person to gave him a part too. Still some part was left. After that part was finished I passed last part for translation .now was time to check and compare it. I force to read and changes all sing language which they usually use to treat and give me suggestion about their proposal of tell this not that.

Any way small by small with four person we got to finished. Now is time for paginate and publishing and I hope I can get throw with all trick that I should use.

I force to tell this because system of translation is deferent and you would be aware why all this change. This includes any thing or any work or project which I intend to work on it for last 25 years they are trying to make my tired but more they try less they get result , as a educator I could not give up to a group of the corrupt people . I will request for your forgiveness if book is with mistake .thank you

Mina Pourzandvakil

INTRODUCTION

This is the harrowing tale of the life and struggle of a girl who was born to make changes in the world around her. The changes that she made around her ever since the moment she was born to the day she died also now after 12 years of her death, made drastic changes that greatly affected, the lives of the handicapped. It is still resonating so many years after she died, and it has been reflected in the US policies towards Iran. The documents that are presented here partly show the bearing it has had on the policies of the US towards Iran. I, as Maryam's mother, have had a strong spiritual bond with Maryam. Indeed, we were kindred spirits, and I had grown so deeply attached to her that I could not imagine life without her. She was an angel, one caught in the throes of an incurable disease, and I was left at the mercy of a bunch of criminals and felons disguised as doctors. In this book, you are presented with a case of criminal negligence on the part of authorities and statesmen, Iranian, American, and British alike, in fulfilling the duty assigned to them.

In this book, you are brought face to face with the flawed American judicial system, especially that of the state of Minnesota, particularly as regards the largest medical facility in the world, the Mayo Clinic. You will see how the very basic rules of medical practice are flagrantly violated with impunity. You will be confronted with the stark reality of American life and how the legal system of the US is a travesty of justice and human rights. You will be presented with compelling evidence concerning what you may have only heard about regarding the rampant human rights abuses in the United States. You will then be left to see how the grim reality stands in contrast to the widespread publicity about the American system. You will also be shown how the policy of the US has undergone change to deceive some Iranians who might be easily tempted at the sight of some American dollars. In the second book, you will read about how some Iranian authorities deliberately or unknowingly fail to follow up on this issue due to naiveté or incompetence. It is bound ultimately to lead to far more serious consequences and problems.

It has been a long time since I decided to have this book written. However, any prospective writer or reporter that was hired was soon

generously bribed into abandoning the task they had hardly started. On the other hand, my own writing being less than perfect, I hesitated about writing the book myself. In the end, I decided there was no way I could let this matter lie and be consigned to oblivion only because I am not the best of writers. Nor could I allow the Iranian public, or for that matter the public opinion of the world, to be kept in the dark with regard to what has happened at Mayo Clinic and how it has been trying to cover it up by bribing reporters and journalists; so, I decided to shoulder the task personally. Confronted with the stark reality, one cannot help but remember all crime was done by a medical organization. To me, the crimes being committed at Mayo Clinic are but one glaring example of that contention.

Next, I am going to have this book translated into other languages in order to further reveal and let the world know how this purportedly reputable medical centre truly acts and how it tries to cover up its wrongdoings rather than pursuing the incidents and trying to account for them.

I should like to offer my sincere apologies to the dear reader for any lack of coherence or eloquence as they might find in my writing. It is partly due to my having been frequently overcome with emotions so intense that I could barely see what I was writing through the tears. Nor could I ask someone else to write it for me as they would soon be bribed into not proceeding with the task. So, I rely on your forgiveness for my poor writing skill.

Also, I should like to point out that I have referred to all the parties by their real names for the sake of clarity and objectivity. It is so that anyone who might feel they are falsely accused of something they have not done can press charges against me and hold me accountable in a court of law. Naturally, I would then be able to produce every piece of compelling evidence I have and let the jury decide if I am telling the truth.

Some parts may seem to have been repeated, but that would be due to the events or actions mentioned having taken place repeatedly; so, it was necessary for me to give their account more or less in a repeated fashion for the sake of maintaining coherence and avoiding distorting the facts. You will also see how some educated Iranian individuals, including some revered doctors, are so easily enticed into betraying their principles by some petty dollars. It is regrettable that they should be so covetous as to allow themselves to be pawns in the hands of Mayo Clinic and their protégés for the meager price of a journey. The rising price of dollar has certainly not helped in mitigating the lure of it for some doctors who may be consumed by avarice, to the point of trampling on their principles.

You will learn how some of my own relatives and associates unwittingly aided and abetted in bringing me down, lending credence to the saying: "Every man is his own worst enemy."

In the end, once again I should like to beg for your forgiveness for any faults you may find in my relating of accounts.

God bless you all
